- » Instant, secure access to vital corporate documents – 24/7
- » The ability to delegate access rights
- » Access to historical information

DMSHARE: YOUR DOCUMENTS ON YOUR TIME.

dmshare is an innovative technology from dms Corporate Services Ltd. (DCSL) that provides instantaneous and secure access to your essential corporate documents. dmshare is accessible 24/7 and provides the ease and convenience in accessing the following stored documentation:

- constituent documents (including registers);
- minutes and resolutions;
- service agreements; and
- financial information.

Additionally, dmshare can also help simplify the audit process in that multiple parties, such as auditors and administrators, can all share the benefits

of dmshare once provided with their independent passwords.

Fast, robust and reliable, but above all else, secure, dmshare offers complete peace of mind. Advanced security includes SSL encryption, password protection, and both active and passive intrusion detection. dmshare is included within the standard registered fee.

To see a demonstration, please visit <http://www.dmscorporate.ky/dmshare.asp> for a "test drive" of dmshare or alternatively contact the Business Development Team at info@dmscorporate.ky.
